Education

2023-2026: Bachelor of Science (Hons) Computer Science and Information Technology
University of Galway

**Final Year Project: The Effect of Historical Checkpoints on a Real Time Strategy Game Agent Training.
Built in Java and Python using the MicroRTS framework. [Final Project Grade 70%]**

Overall degree grade: 56%

2018-2022: Bachelor of Science (Hons) Physics with Astrophysics
University of Maynooth

Transferred into University of Galway in 2023 from third year.

2013-2018: Leaving Certificate (456 points)
CBS Roscommon

Work Experience

Software Engineer (Placement Student)

January 2025 – September 2025

Boston Scientific, Galway

- Maintained and extended a substantial C# MVC web application used by Software Validations to manage document reviews and review cycles; traced the undocumented codebase and fixed bugs, including Microsoft-account name matching during submissions.
- Improved the search function to query document title, department and sub-department, return results chronologically, and recognise legacy department information embedded in document titles without modifying historical production data.
- Added additional support for sub-departments and tested all changes locally against a test SQL database; used GitHub for version control before preparing tested updates for production publication through Visual Studio by a team member.
- Documented the application's architecture and files, added code comments where needed, and transferred system knowledge to a team member assigned to maintain the application after my placement.
- Created meeting management software for the Software Validations department using Power Apps with SharePoint Lists as a backend, and coordinated updates and required downtime with the team and other departments.
- Took part in a cross-functional team tasked with implementing LLMs into the Software Validations department.

Lifeguard/Swim Instructor

June 2021 - August 2021 and May 2022 - August 2023

Roscommon Leisure Centre, Roscommon Town

- Enforce pool rules and regulations, ensuring a safe environment for patrons.
- Conduct swimming lessons tailored for individuals or groups of varying ages and skill levels.

IT Skills

- Full-stack development skills, front-end and back-end.
- Java, Python, C#, C
- HTML/CSS, MATLAB
- MySQL/MariaDB
- Excel/Word/PowerPoint (Microsoft Office)
- Participated in Agile development process for a Software Engineering project in second year which used **Firestore** services and was built on **JavaScript** and **Vue.js**.
- Proficient in the use of **Power Apps** for web applications. Achieved the Power Platform Fundamentals certificate from Microsoft.

Skills Profile

Communication: developed efficient communication skills as a lifeguard and swim instructor; leading school tours and teaching lessons.

Teamwork: Extensive teamwork experience through working with Boston Scientific, pushing changes to an active production environment across multiple departments. Organising meetings between department leads to discuss upcoming software updates and coordinate downtime.

Problem Solving: Proficient critical thinking skills gained through experience working on undocumented software as a placement student in Boston Scientific.

Diligence: As a hike leader attention to detail is vital when you are planning routes in untrailed mountains and account for weather, the terrain and your fellow hikers.

Certifications

- Full Irish Driving Licence
- Mountain Skills 2 2024
- Remote Emergency Care 3 2024
- Microsoft Certified: Power Platform Fundamentals (PL-900)

Hobbies

Hike Leader: Hike Leader in the University of Galway Mountaineering Club, leading groups of 20+ students in the mountains of Connemara.

Volunteering: I volunteer with MADRA dog charity in Galway and have adopted two rescue dogs in the past.
